Re: Freeaire Refrigeration System

To Whom It May Concern:

Efficiency Vermont (EVT) is pleased to write this letter of recommendation for the Freeaire Refrigeration System. Since Efficiency Vermont's inception in 2000, EVT has provided rebates and technical assistance to more than 80 Vermont electric customers who have installed the Freeaire System. These installations have reduced the electric use in Vermont by more than 2 million kilowatt-hours annually, and growing. Through these 80 installations, Efficiency Vermont has heard nothing but positive responses from customers – with many of them reporting dramatic reductions in their electric bill.

Freeaire's commitment to their products and their customers shows through in their work. Efficiency Vermont looks forward to continued support of the Freeaire System into the future.

Sincerely,

Gabe Arnold  
Efficiency Vermont
